LAGOON 400 - YEAR 2012

# 1) THE CATAMARAN

"DALI" 

# 1) THE CATAMARAN

## Plenty of space

Dali is a luxury beauty, type Lagoon 400, over 11,97 meters long and 7,25 meters wide: plenty of space for a lovely sail or even to live on board. Space for up to 10 persons to stay the night, on daily trips you can even bring more friends and family!

Once on board almost everyone falls a little bit in love with her. In the first place, because she is surprisingly spacious and comfortable. So privacy on board for every guest is certainly not a problem! Especially when you compare her to a regular (mono-hull) sailing ship:

- Thanks to her two floats / hulls, The Dali is very stable! So much less risk of seasickness!
- The Dali gives you a lot of freedom of movement and many different nice places to sit, relax, lay down or just walking around. So plenty of space for everyone to stay.
- With no less than two engines, the Dali is very strong and practically unsinkable.
- Thanks to her shallow keel, we have the opportunity to sail even the most inaccessible places. And those are often the most beautiful.
- You have an unobstructed view of the surroundings almost everywhere on the Dali, even when you're inside thanks to the windows all around, that gives a beautiful panorama view.
- The Dali offers not only comfort, but also more privacy thanks to the separate cabin design.

## REFERENCES FROM THE OWNERS

"An apartment on water!"

That's how we label this boat. Fully equipped for families or groups of friends. With all the comforts and luxuries. We have enjoyed this boat for two years, in which we mainly (95%) anchored. Only in the winter we stayed in the marina / dry dock for rest, safety and of course major maintenance. Completely self-sufficient with a watermaker that fills the 600 liter tank, solar panels and a wind generator that has always provided us with sufficient electricity. Little sun? No problem, the generator will then pick it up independently thanks to the built-in safety system.

Because we have used this fine Lagoon 400, with our little family, permanently as a home it is in top condition. Every year the boat has been taken out of the water for antifouling (02/2021), polishing (02/2021) and regular checks of the engines and electrics (12/2021). A conscious decision to not have gas on board has fallen to us, possibly this is easy to re-install.

**As soon as you step aboard, you are ready to sail around the world!**

The previous owner has owned the boat for about 2 years on the drydock, the owner before that has enjoyed this fine catamaran for five years. All owners to date are true boaters and boat connoisseurs. With the most appropriate boating equipment on board, this boat is in perfect condition despite her age (2012).

Please check our website [www.dalisailing.com](http://www.dalisailing.com) and socials (instagram / facebook) for our story

# 3) CONDITIONS

## CONDITIONS IN GENERAL

- **Condition in General : Used but in good (maintained and clean) condition**

- Trampoline replacement : scheduled 03/2022
- Rigging and sail checks : scheduled 03/2022

LAGOON 400 - YEAR 2012

## 4) FORWARD (Front deck)

"DALI"

## 4) FORWARD (FRONT DECK)

### The most favorite chill spot of this vessel!

The ultimate chillspot: lazing with the wind through your hair on the foredeck.

A similar comport to a hammock, but a bit firmer. Lovely stretched out on the relaxed trampolines between the floats!

While sailing, when we're anchored in a beautiful bay, reading or just work on your suntan, it's all up to you.

Due to our safety nets around the ship, lifejackets (incl lifelines) this spot is also an ideal play area for the kids!

## 4) FORWARD (FRONT DECK)

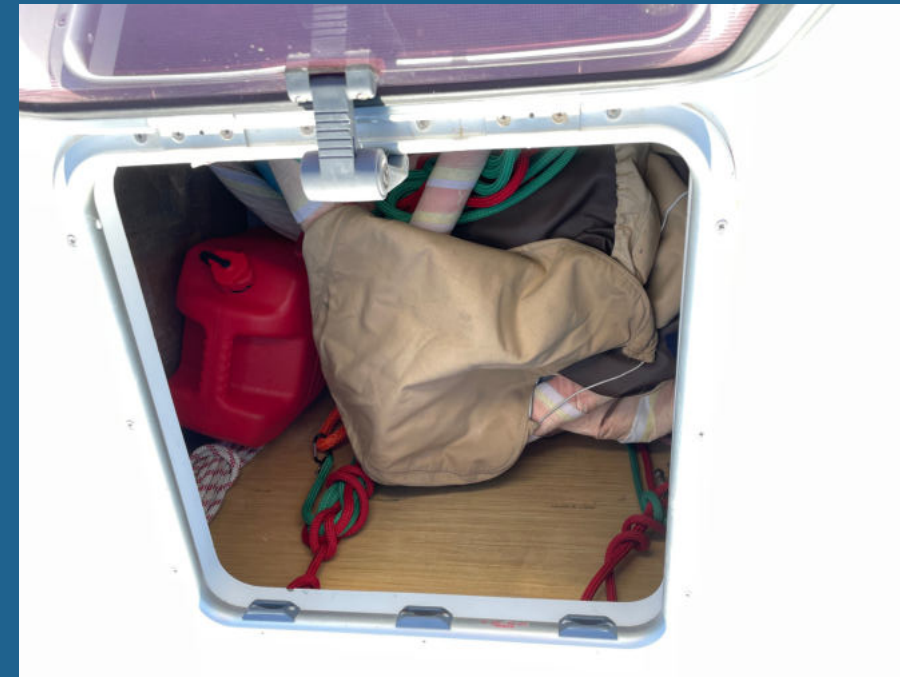

### Storage or extra sleeping compartments

A vessel with plenty of storage space.

So too on the front deck, with a double-bottom compartment in the tip on either side for storage. Extra sails, lines, fishing tackle, cushions, you name it and it will fit in there. (all these items are optional to take over by purchase of the vessel)

In the middle, a deep storage area, where the water tanks are located, the anchor chain lies, an extra anchor is present, extra lines and fenders. (all the items in this storage are included)

In some cases, this space is transformed into an additional sleeping compartment. For example in charter cases, this can be the spot to sleep for the crew. Please note the current conditions is just for storage. There is no bed or sanitary facilities here.

LAGOON 400 - YEAR 2012

## 5) STERN-DECK

"DALI"

## 5) STERN- DECK

### The place for lovely diners with your family and friends!

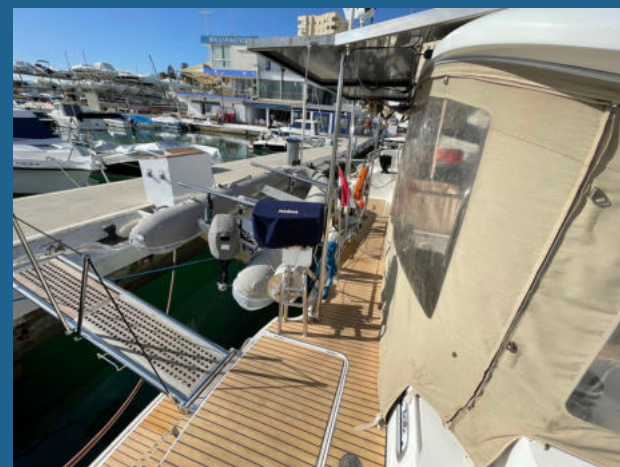

From morning coffee to last drink of the day. No lack of space. Inside and outside are ground-floor, when the door and sliding window open in a blink of an eye, the spaces merge into each other and there is twice as much living space!

The entire space is covered, as fine sun protection, or if a raindrop comes over you can simply relax dry here and enjoy the soothing drops that fall on the water.

The sun protection is adjusted especially for little kids, so they can't walk any further than just this area. That gives you the guarantee you can enjoy your meal without any stress of kids falling overboard.

As an extra, besides a spacious kitchen in the living room, we also have a chef's barbecue! The lift for the dinghy is also at the stern with a roof of solar panels above it.

Under the solar panels we made an easy spot to store your floatable SUP-board. Perfect location, not in the gangway and highly protected against the sun!

## 5) STERN- DECK

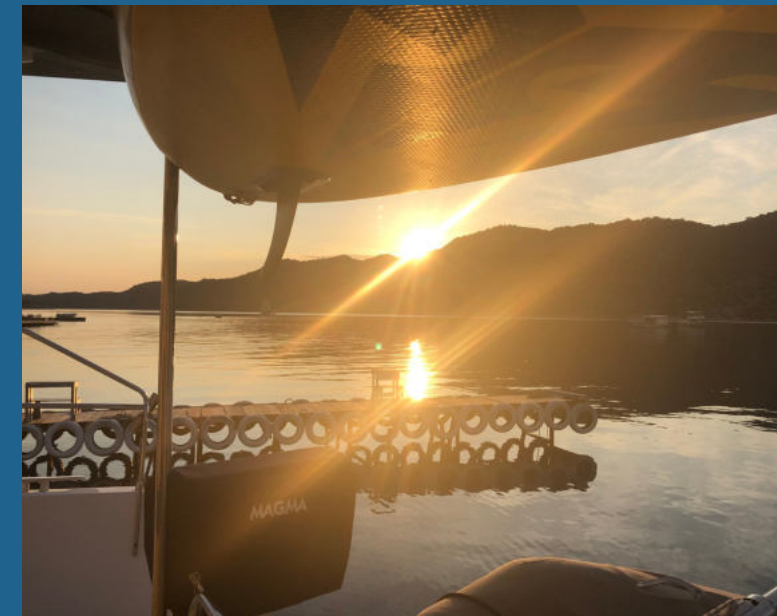

### Storage and kids-proof

Under every couch area there is a big storage for the generator, the most used tools, jerrycans, hydraulic and filter spares, paint and teakwood treatment spares, water-hose and connections, safety items and your grab-bag in case of emergency. And last but not least, at the stern is installed 75m of D14 (on role). Especially when having a line from the stern to a rock or something, this is really helpful to have immediately by hand. (All these items are optional to take over by purchase of the vessel)

Of course, each sofa is equipped with a fine outdoor cushion to sit comfortably during long dinner sessions or fine drinks moments.

A family boat must be kids-proof, so for the little ones:

- children's playpen / box (or usable for storage etc)
- the 'door' area in the sun-protection has a zip on the middle of it, so the little ones can't get out.
- at the captainseat there is a similar protection as well.
- with kids your new hobby seems to be washing of clothes, so the sterndeck has a clothes line for all the laundry

LAGOON 400 - YEAR 2012

## 6) LOUNGE AND KITCHEN

"DALI" 

## 6) LOUNGE AND KITCHEN

### The place for lovely diners with your family and friends!

The lounge, or living, is spacious and fully equipped, including a lovely lounge sofa in an L-shape, a large dining table with 2x extra stools, a work corner (navigation desk) for the skipper and of course the kitchen, where everything comes down to fresh food. The room has all-around eye-level windows: you'd almost forget you're inside with such a nice panoramic view. Luckily, even if you stay inside, you don't miss anything of the beautiful surroundings, the sun on the water and the cozy crowds on and around the ship.

For the hot-days this area is equipped with fans for cool air, for the cold days there is a diesel system to keep the boat cosy and warm.

## 6) LOUNGE AND KITCHEN

### Storage and equipment

The most important moment of the day, is of course marked by food and drink! With a boat for 8-10 people, you'll need plenty of dishes, glasses and storage.

There is ample storage under each bench section and even the two stools have storage. The spacious windowsills provide plenty of room for all your (sailing) literature.

The kitchen has a spacious Vitrefrigo refrigerator, a large built-in trashcan and a spacious cabinet under the sink for pans etc. With a large double sink, an induction stove (gas is an option), combi oven and microwave, this kitchen is fully equipped. The cabinet above the combi oven-microwave is a dark cabinet, which is ideal for fruits and vegetables to last as long as possible. A wine cabinet and overhead cabinets for all your spices and other items give you plenty of room to make your meals truly delicious.

The current owners have had an additional cabinet built, with new cutlery drawers. They even thought of hanging the wine glasses neatly. An additional cabinet on the side provides space for cleaning supplies, trash bags, etc. (In consultation, a number of kitchen utensils for takeover at the sale).

Kidsproof notification : For both stairwells there is the option to install a stair gate. These are available and made of sturdy sail material.

LAGOON 400 - YEAR 2012

# 7) SLEEPING COMPARTMENTS

"DALI"

## 7) SLEEPING COMPARTMENTS

### The masterbedroom

There are two spacious sleeping cabins in each float. The sleeping cabins at the rear are characterized as the "master bedrooms". With a spacious queen-size bed, equipped with a good lathing, this is the ultimate place to properly relax. Equipped with a spacious closet, drawers and clothes hooks. Sockets for 220V and 12V are available. Enough sunlight through the large windows, blinds for a dark room to sleep. For hot days, the skylight can be opened for sufficient ventilation and don't forget the nice van inside the room. Suffering from mosquitoes? No problem there is a mosquito net and blackout curtain at this window. The windshields in all bedrooms have been replaced 02/2021.

Under the beds are drawers for clothes, as well as built-in appliances. On the port side you will find o.a. the water maker (control panel is in the lounge), Victron lithium battery system and the fugeboxes. On the starboard side, under the bed, you will find the water heater and fuses. In these two master bedrooms you will a.o. find, in the floor, the switch for the black water tanks

(optional: pillows, blankets, sheets for acquisition on sale

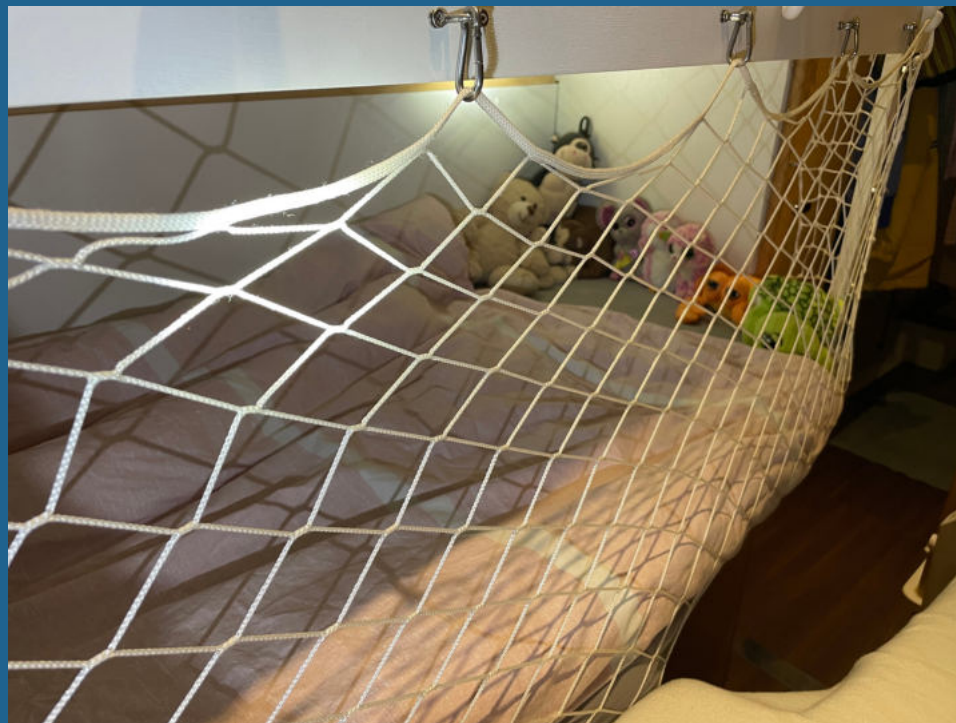

# 7) SLEEPING COMPARTMENTS

## The second bedroom

The second bedroom per float, is multi-purpose!  
From small children who can sleep here safely, with possibly their siblings.  
Or pull out the drawer and turn this into a lovely spacious double bed for adults (queensize).

Thanks to the built-in bunk bed, the bottom bed can be completely secured with a safe net so that the little ones can't fall out of their beds in any way. A camp bed is therefore completely unnecessary.

Under these beds there are storage spaces for extra pillows, blankets or other storage items. Drawers and cupboards are located between the two lower beds, a spacious wardrobe with hanging area before the bed and enough coat racks ensure that there is more than enough room for the contents of your suitcase.

LAGOON 400 - YEAR 2012

## 8) BATHROOMS

"DALI" 

## 8) BATHROOMS

### Two spacious bathrooms! One in each haul.

After all the swimming and enjoying the sun, it's great to take a hot shower at the end of the day. The "Dali" has a boiler a 60L so enough for a long shower to wash the salt out of your hair.

The shower area is off with a (plexi) glass door, which combined with the white-and-wood look gives you a luxurious spa feeling. The large sink with mirror cabinets gives ample room for towels, beach towels and toiletries.

Additionally, the bathroom has a 3L Deawoo washing machine on the port side. The perfect washing machine on board, thanks to the minimal use of water and electricity. Especially with a family this is a must-have to have. The other bathroom on the starboard side has a spacious medicine cabinet.

For the current owners, it was a conscious decision to choose only two bathrooms in total. Besides the fact that the bathrooms are more spacious, that way you're not standing over the toilet showering. Of course, this also saves on maintenance. Fewer inputs and outputs for the water supplies, fewer hoses and other connections. This layout is quite unique for a catamaran but certainly pays off. All the hoses of the toilets have already been replaced (02/2021).
